## Document Body

---

Kathy,

Well, now that the WQS crunch is over I expect to get back to some field work. I hope you had a good weekend (the weather was great). Field work means some more questions.

Felicia had left me a message about updating our QAPPs for surface water monitoring and biomonitoring. I could see taking the contaminant survey info out and only including our monthly monitoring to simplify the QAPP until such time as we get funding to carry out a second contaminant survey (several years into the future). Do you have any further info on that? Also, the wellhead protection QAPP is still in limbo or have we received a conditional approval. The USGS says they should soon be sending us a draft of the report or at least a letter report that may be useful to the QAPP if we are still required to send the data for the QAPP. Did Simon answer that question?
